

## Status, March 2017

### Changes regarding import and export of waste

	Problem	Description	Implementation
1	<p><i>Calculation of "3 working days" pursuant to art.16 (b) in Regulation 1013/2006 (EU Waste Shipments Regulation).</i></p> <p>a) How is the 3-working days pre-notification period calculated?</p> <p>b) Is it possible to start transport of waste before or after the pre notified date?</p>	<p>a) The day the pre-notification of shipment is received is calculated as day 1 of the 3-working days period. As a result, it is allowed to ship waste one day earlier than previously.</p> <p>b) It is possible to start the shipment of waste on the pre-notified date or within the following 2 weeks without having to make a new pre-notification of the shipment. Previously it was possible to start shipments on the pre-notified date or one of the following six days.</p>	<p>a) Implemented.</p> <p>b) Implemented.</p>
2	<p><i>Wish to use an insurance equivalent to a financial guarantee covering shipments of waste instead of a financial guarantee.</i></p> <p>a) Is it possible to use an insurance equivalent to a financial guarantee covering shipments of waste instead of a financial guarantee?</p> <p>b) When importing waste from countries outside the EU, is it possible to simplify the procedure when retrieving offers on alternative waste treatment?</p>	<p>a) The businesses will get the option to give security either as a financial guarantee or as an insurance equivalent to a financial guarantee. Information and guidance will be published on the Danish EPA's website.</p> <p>b) Consignees will get the option to apply their own price on waste treatment when calculating the price on alternative treatment.</p>	<p>a) Will be made possible by second half year of 2017.</p> <p>b) Already applicable</p>

<b>3</b>	<i>Recovery waste site pre-consent.</i>	Henceforth certain recovery sites will be able to obtain a pre-consent if they meet the conditions. Information and guidance will be able on the Danish EPA's website.	Terms and conditions will be published on the Danish EPA's website in June. After the publication of the terms and conditions it will be possible to start applying for site pre-consent.
<b>4</b>	<i>The option of sending export notification applications via e-mail.</i>	It is already possible to send export notification applications via e-mail.	Implemented.
<b>5</b>	<i>Simplification of the documentation requirement regarding shipments destined for interim operation.</i>	In certain cases where the waste has been subject to prior notification and after the interim operation has become green-listed waste, less documentation requirements has to be met.	Implemented.
